

## High Current Carbon Brush Slip Ring

Rugged graphite brushes for high currents

We use so-called high-current brush holders for lightning protection and transferring earthing currents from static to rotating components.

LPA series is a cluster of slip rings characterized by high current transmission up to 2000A (peak current). It adopts state-of-the-art technology with special design to meet different requirements of multifarious fields.

Model	Circuits	OD x L(mm)	Max Current	Voltage	Signal
LPA000-09800-01PE-3020-04L	44	∅ 1250 x 3000	800 amps	440VAC/230V	Optional
LPA000-03250-01PE-0215	6	∅ 396 x 380	250 amps	440VAC/220VA C	Optional
LPA000-02800-02400-0305-E2-FO04	9	∅ 268 x 720.6	800 amps	240VDC	Ethernet, Fiber
LPA000-14500-1250-0902-02E3	37	∅ 650 x 2295	500 amps	380VAC	Gigabit Ethernet
